Personal Profile (基本情况简介)

(around 150 words, including basic introduction, research direction, teaching experience as supervisor for international students)

It is my favor to have an opportunity to recruit oversea students who were interesting in studying and doing clinical image medicine research in Fujian Medical University. This is my first time as a supervisor for international students. Fujian Cancer Hospital will be an amazing place and a good choice for you as your master career. As a doctor, I have devoted myself in oncological imaging research for more than 17 years and published more than 25 international papers in field of medical imaging. Furthermore, I visited School of Nebraska Medical Center in USA three years ago, from where I did learn a lot in term of western medicine practice, medical culture, and acquired skills to explore and launch innovated scientific researches. Currently, I am a supervisor both at Fujian Medical University and Fuzhou University. Hence, I now focus more on AI and some other new techniques in tumor screening, diagnosis, therapeutic response assessment, and prognosis prediction, and can unit other supervisors together to make a cross discipline researches.
