			<input type="checkbox"/> P.H.D/M.D <input type="checkbox"/> Master	<input type="checkbox"/> Academic <input type="checkbox"/> Professional

Personal Profile (基本情况简介)

(around 150 words, including basic introduction, research direction, teaching experience as supervisor for international students)

My name is Wuchaohui, and have graduated from Fujian Medical University, majoring in Thoracic Surgery, and now I'm working in The Second Affiliated Hospital of Fujian Medical University. I am the deputy chief of CARDIOTHORACIC surgery. I often give theoretical and experimental lessons to medical students. At the same time, I am also a Master's supervisor.

During my master study, my interest mainly focus on basic and clinical study of oesophageal and pulmonary diseases. I continued my research after work. However, due to the limited level in theory and research, learning theory knowledge and absorbing experience are the primarily tasks for me. So for now, I'm continuing my phd in Cardiothoracic Surgery. There are two ways about academic training that I have received these years. On the one hand, I have read parts of the classic works of Thoracic Surgery to lay a good theoretical foundation for my major. On the other hand, I have participated some academic conference to learning the cutting-edge issues of my major.

I have got a cet-6 certificate. I have not any teaching experience as supervisor for international students before. But I am now actively and effectively practicing oral English and listening. I hope to guide the process of graduate students in China to achieve teaching and learning. So I hope to have the opportunity to instruct the graduate students who come to China.
