Period (起止时间) Institution/University, City, Country (国家/大学/机构/职称) Sep. 2011-Aug. 2012 Visiting Scholar/Medical School of Nagasaki University/Nagasaki/Japan

Major & Research Direction (招生专业及研究方向)

Displine Level II&III Displine Level I (一级学科) (专业名称: 二科+三级学科) Clinical Medicine Surgery/Cardiothoracic Surgery

Research Direction Level (研究方向及专长) (层次) □P.H.D/M.D Basic and Clinical Research on Thoracic

✓Master ▼ Professional

Type (学位类型)

□ Academic

□P.H.D/M.D □Academ ∏Master ☐ Professional

Personal Profile (基本情况简介)

(around 150 words, including basic introduction, research direction, teaching experience as supervisor for international students)

I'm familiar with the diagnosis and treatment of diseases of esophagus, lung, and mediastinum, especially open and minimal invasive surgeries related to esophagogastrectomy, simple or combined lobectomy, segmentectomy, resection of mediastinal neoplasms with vascular reconstruction and performance of fibrobronchoscopy and EBUS examination as well. I focus on the epigenetic alteration and its prognostic effect on the outcome of lung cancer, as well as some clinical research on lung and esophagus malignancies, with a number of SCI papers published (202 citations in total) and an accumulated impact factor of 40. In July 2022, I have successfully won the "Fujian Research and Training Grants for Young and Middle-aged Leaders in Healthcare" and a foundation of 5 million CNY from our government. My total research fund has come to 5.8 million CNY. In addition, as a part-time interpreter, I speak very good English with a standard American accent and could achieve non-barrier communication with foreigners, which might greatly facilitate the international teaching and research.
