

Resume of Supervisor of Fujian Medical University
福建医科大学来华留学研究生指导教师简历

周子雄 Zixiong Zhou

Institute (学院):	School of Basic Medical Sciences	Department (科室):	Department of Pathology
Professional Title (专业职称):	Medium-grade professional title	Teaching Title (教学职称):	Lecturer
Contact (联系方式):	/	E-mail (电子邮箱):	zzxpathology@fjmu.edu.cn

Work Experience (工作经历)

Period (起止时间)	Institution/University, City, Country (国家/大学/机构/职称)
02, 2020—10, 2020	Postdoc researcher, Jeonbuk National University, Iksan City, South Korea
12, 2020—Now	Lecturer, Fujian Medical University, Fuzhou City, China

Education (教育背景)

When&where to obtain the highest degree (何时何校获最高学位及学历)

Period (起止时间)	University, City, Country (国家/大学/最高学位)
03, 2017—02,2020	Ph.D. Degree, Jeonbuk National University, Iksan City, South Korea

Overseas Experience 出国经历

including study, research and foreign aid (含留学、援外、研修)

Period (起止时间)	Institution/University, City, Country (国家/大学/机构/职称)
03, 2015—02,2017	Master Degree, Jeonbuk National University, Iksan City, South Korea

Major & Research Direction (招生专业及研究方向)

Displine Level I (一级学科)	Displine Level II&III (专业名称: 二科+三级学科)	Research Direction (研究方向及专长)	Level (层次)	Type (学位类型)
Basic Medicine	Pathology and Pathophysiology (Pathology)	Drug-induced liver injury/NASH/Liver fibrosis	<input type="checkbox"/> P.H.D/M.D	<input checked="" type="checkbox"/> Academic
			<input checked="" type="checkbox"/> Master	<input type="checkbox"/> Professional
			<input type="checkbox"/> P.H.D/M.D	<input type="checkbox"/> Academic
			<input type="checkbox"/> Master	<input type="checkbox"/> Professional

Personal Profile (基本情况简介)

(around 150 words, including basic introduction, research direction, teaching experience as supervisor for international students)

My research has been started with focusing on molecular targets in liver diseases. I worked for my Ph.D. with research on the roles of ferroptosis, TBK1/IKKε and TLR5 in the pathogenesis of liver injury in mice. I am well trained in pathology, molecular biology and toxicology. I have extensive experience in animal and cellular studies. Recently, my main research direction is to explore immunotherapy targets for acute and chronic liver diseases, including drug-induced acute liver injury, non-alcoholic steatohepatitis and liver fibrosis.
