### Personal Profile (基本情况简介)

(around 150 words, including basic introduction, research direction, teaching experience as supervisor for international students)

My research has been started with focusing on molecular targets in liver diseases. I worked for my Ph.D with research on the roles of ferroptosis, TBK1/IKK $\epsilon$  and PPAR $\gamma$  in the pathogenesis of liver injury in mice. I am well trained in pathology, molecular biology and toxicology. I have extensive experience in animal and cellular studies. After joined Fujian Medical University, I have been working as a lecturer teaching undergraduate students on Biochemistry and Molecular Biology, from China and other countries.
