			<input checked="" type="checkbox"/> Master	<input checked="" type="checkbox"/> Professional
			<input type="checkbox"/> P.H.D/M.D	<input type="checkbox"/> Academic
			<input type="checkbox"/> Master	<input type="checkbox"/> Professional

### Personal Profile (基本情况简介)

(around 150 words, including basic introduction, research direction, teaching experience as supervisor for international students)

I am a nephrologist in the Department of Nephrologist, Fujian Provincial Clinical College. I received my medical degree from Xiangya Medical School, Central South University and has been in practice between 11-20 years. My research interests center around the inflammatory mechanisms of diabetic nephrology to understand the cell type-specific responses during disease development and progression. My research work is mostly motivated by the unresolved questions arising in kidney research, and aims to find potential therapeutic target for diabetic kidney disease. I am also involved in epidemiological studies in CKD, and study the associated lifestyle risk factors with the progression of CKD. The findings of our work had been published in peer reviewed journals such as J Am Soc Nephrol; Kidney int; Nephrol Dial Transplant etc.
